INFRASTRUCTURE SERVICES

SCALABLE, RELIABLE, AGILE

The changing business ecosystem, disruptive technology landscape and ever-evolving user expectations have raised the bar for the delivery of IT infrastructure and services.

To achieve this, it is required that IT infrastructure remains scalable, flexible and at the same time reduces the "Total Cost of Ownership" and assists business not only to remain relevant but also competitive in a digital age.

We, at Core IT, collaborate with you to build and manage a predictable, available and reliable IT infrastructure. We leverage our expertise, best-of-class partner ecosystem and industry knowledge to function as technology partner focused on providing result-oriented technology services.

OFFERINGS

Our infrastructure service offerings cut across advisory, design, implementation, monitoring and management and are business-centric. We drive continuous service improvement by following industry best practices, implementing improvement plans and introducing service framework to improve IT infrastructure availability.

PROFESSIONAL SERVICES

EXPERTISE, INNOVATION, PARTNERSHIP

HOW WE DELIVER

Our professional services are vendor agnostic and provide 360-degree services from consultation, planning to execution, enabling unification of people, processes and technologies by directly aligning these to dynamic business needs.

In evolving business ecosystems, coexistence and inter-operability between functions and systems not only depend on the IT infrastructure but also on the associated services that can be aligned to achieve business goals. As the technology landscape has become highly disruptive, the IT teams are facing challenges to deliver services to meet the business requirements as they do not have access to skilled manpower, knowledge, best practices, standardized processes and expertise on latest technologies.

Our IT infrastructure services allow business to outperform the competition and remain relevant in market by creating solutions that complement business objectives.

CIS 18: BUILDING THE FOUNDATION FOR CYBERSECURITY EXCELLENCE

SECURE, COMPLY, EVOLVE

In today's rapidly evolving threat landscape, achieving a robust cybersecurity posture is no longer optional—it's essential. The CIS 18 Controls, a comprehensive and prioritised framework, provide a solid shield to safeguard your organisation against the most common cyber risks. At Core IT, we specialise in implementing CIS 18 as a baseline compliance standard, ensuring your organisation is secure, compliant, and ready to adapt to future challenges. Whether starting your compliance journey or enhancing an existing framework, our tailored approach simplifies implementation, strengthens security, and delivers measurable outcomes..

We, at Core IT, collaborate with you to build and manage a predictable, available and reliable IT infrastructure. We leverage our expertise, best-of-class partner ecosystem and industry knowledge to function as technology partner focused on providing result-oriented technology services.

OFFERINGS

Cost-Effective Security Implementation
- Adopt scalable and prioritized controls tailored to your organization's size and resources.
- Reduce long-termcosts through preventive security measures

Enhanced Risk Management
- Prioritize and mitigate high-risk vulnerabilities through structured controls.
- Proactively identify and address cybersecurity gaps.

Improved Operational Resilience
- Strengthen your defenses against evolving threats.
- Ensure business continuity with effective incident response measures.

Simplified Compliance
- Ensure alignment with industry and regulatory standards, such as PCI DSS, ISO 27001, and NIST.
- Streamline audits and reporting with pre-mapped CIS 18 compliance frameworks.

+ADVANTAGE

ENHANCED RISK POSTURE

ACHIEVED 90% REDUCTION IN HIGH-RISK VULNERABILITIES

FASTER INCIDENT RESPONSE

60% FASTER DETECTION AND RESPONSE TO SECURITY INCIDENTS

IMPROVED COMPLIANCE READINESS

95% CLIENTS ACHIEVE REGULATORY COMPLIANCE WITHIN FEW MONTHS
